

## Hockey Drill Animations Can Now Be Viewed on iPad

All of our hockey drill animations have been previously displayed using Flash, a file format not supported on iPhone or iPad. We now have a way to create file formats from the original drills in and HTML5 format. The great news is that this format is viewable on iPhone and iPad. All of the free drills throughout the site have been updated to this new file format and all new drills and systems will use this format. We are currently in the process of exporting all of the drills into this new format and over the coming months most of the drills on the site will be displayed using HTML5 instead of Flash.
