

New Method for Creating a Practice

Ice Hockey Systems recently developed a new method that makes it very easy for members to save drills to a practice. The previous method of creating a practice still exists, but we added in a new function that will allow you to save a drill to a specific practice while browsing through drills. Each individual drill page will have a list of your saved practices to the left of the drill. To add that particular drill to a practice all you have to do is hit the "add" button. This new functionality allows members to get creative with their practices and find the perfect drills to have your team work on developing specific areas. Please take a few minutes to watch our video on how to create a practice.
